NATURAL

Use signage and "sharrow" pavement marking to offer alternative on-street route for the Lionel-Hampton Trail along Browning Street

This plan repurposes the tennis courts as a skate park to introduce a new recreational element in the park

Existing basketball court resurfaced with creative forms and expressive colors

This plan increases lighting throughout the park, focusing on the PATH trail and entrances

The pedestrian bridge is repaired with a more traditional truss design

In this plan, interpretive signage is distributed throughout the park, rather than located in one place.

**Repair existing shell
and add more seating**

Expanding the parking lot eastward will increase the number of parking spaces, but would result in the loss of some trees.

In this plan, the area around the Ezra Church plaques is paved and landscaped

New park signs
at all major
entrances let
people know
this is a space
for everyone.

**Remove part of median
to allow left turn into
athletic field parking lot**

The Department of Watershed Management is installing several small rain gardens throughout the park to improve stormwater control and reduce flooding.

These benches, spaced along MLK, feature bronze sculptures of local civil rights champions. This project is being managed through the Mayor's Office of Cultural Affairs.

Use unprogrammed park space between Browning St and Martin Luther King, Jr Drive to create a 1-acre dog park
